40FT HIGH CUBE CONTAINER

40ft High Cube Container

40ft High Cube shipping containers are popular for storing a large volume of goods on sites with more available space. This container size is also well suited to modifications, such as a workshop, shed alternative or to construct homes.

Key Features

- Wind and watertight
- Pest and vermin proof
- Wooden Floors
- Lashing points at the floor and ceiling to secure your goods
- Secure and lockable via our lockbox system
- Approx 12.2m H x 2.5m W x 2.9m H

Options

- Lockbox
- Electrical fitout (power and lighting)
- Steel floor
- Transport/Shipping Certification
- Low cube 8'6" (height 1ft less)
- Variety of Container Grades available - New or Used
- Additional custom container modifications available including shelving

Details

Built from weathering carbon steel, these units are secure from wind, water, vermin and thieves.

40ft High Cube containers are suited to sites with a larger available space. Measuring just over 12 metres long, these are not generally suited to standard residential blocks, although these can be squeezed onto driveways in some cases.

Given their large internal volume and one-foot extra height, they are often used for more than just household or business goods storage. They are an affordable and ready-made alternate solution to sheds or workshops. They can store machinery and equipment parts, or be used for site offices or accommodation away from the main building, with some minor modifications. And yes, they feature prominently in container homes.

Whatever you store in your 40ft High Cube shipping container, you can rest assured it will be safe.

Specifications

40ft High Cube Container | HC496

Specifications may vary

Internal		External	
Length (mm)	12,032	Length (mm)	12,192
Width (mm)	2,350	Width (mm)	2,438
Height (mm)	2,695	Height (mm)	2,896

Weight

Tare (kg)	4,670
Payload (kg)	29,330
MGW (kg)	34,000

Top Left: 40ft high cube shipping containers provide the most onsite storage in our range (or anyone else's).

Middle Left: A lock box will deter thieves and better protect your goods inside.

Middle Right: Internal floors are strong and safe to store even fragile items on.

Bottom: If you have ample space onsite, the 40ft high cube is the way to go for large volume storage needs.
